ONSTAR WITH 4G LTE (EXCLUDING CAMARO & TRAVERSE)

ONSTAR WITH 4G LTE¹ MAKES YOUR VEHICLE A ROLLING HOTSPOT

Your vehicle can be a rolling mobile hotspot with great signal quality and bandwidth for up to seven devices. OnStar with 4G LTE service allows everyone in your vehicle to enjoy his or her own content. A three-month/3GB, whichever comes first, trial is included when the OnStar complimentary service is activated (OnStar's Basic Plan is included for five years).

Press the OnStar Voice Command Button on the mirror or overhead console or, if available, select the "OnStar" icon on the radio home screen. Wait for the prompt and the beep and say, "Wi-Fi Settings." The screen will display the name and password for your Wi-Fi hotspot.

Go to Settings on the device you want to connect and find the name of your vehicle's 4G LTE Wi-Fi connection. Select the hotspot and input the password. Then, connect.

Press the blue OnStar button and speak to an Advisor to change your 4G LTE Wi-Fi name and/or password, or manage your settings in your RemoteLink mobile app.

Video: OnStar with 4G LTE

¹See onstar.com for a detailed instruction guide, vehicle availability, details, and system limitations. Services and apps vary by make, model, year, carrier, availability, and conditions. 4G LTE service is available in select markets. 4G LTE performance is based on industry averages and vehicle systems design. Some services require a data plan.

CAMARO – CRUZE – EQUINOX MALIBU – SS – VOLT

FEATURES HELP KEEP CUSTOMERS CONNECTED

Camaro, Cruze, Equinox, Malibu, SS and Volt with MyLink raise the radio's connectivity with:

- Text Message Alerts – **play a text message** over the audio system and respond with a preset message
- **Siri Eyes Free** – gives compatible iPhone users **hands-free access to some of their phone's features, like the calendar and text messaging**; Chevy is the first manufacturer in-market with Siri Eyes Free

These features are intended to prioritize safety for driver and passengers. Driver focus should always remain on driving, and GM strongly recommends that drivers never input text using a handheld device while driving.

Video: Text Message Alerts

TEXT MESSAGE ALERTS

If your Camaro, Cruze, Equinox, Malibu, SS or Volt with MyLink is paired with a Bluetooth device that supports Text Message Alerts, the system:

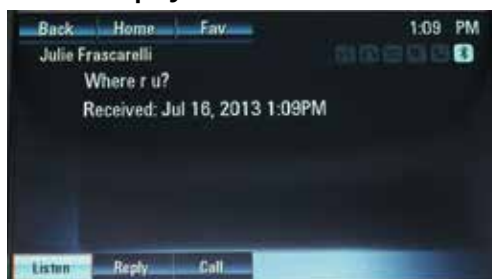

- **Can display important text messages**
- **Can play them back** over the audio system
- **Can send preset or create new preset messages**
- **Requires a compatible smartphone** with Bluetooth profile (M.A.P.) and **applicable text messaging features**. For more information about varying capabilities, go to gmtotalconnect.com. For example, iPhones require unique set up requirements and offer limited Text Message Alert capabilities

HOW TO USE TEXT MESSAGING

- Press **"Messages"** button on Home Page

- When messages are retrieved, **"Text Message" inbox displays**

- Select message for viewing (**only available when vehicle is not moving**)

- Select **"Reply"** to reply and select desired message from display of preset messages, then select **"Send"** (this function is not available for iPhones)

- **Incoming text messages**
 - Pop-up screen displays
 - Select listen, view, dismiss or call
 - Turn off display alerts from the **"Settings"** button

CAMARO – CRUZE – EQUINOX MALIBU – SS – VOLT

SETTING UP TEXT MESSAGING DURING PHONE PAIRING

ANDROID AND BLACKBERRY

- **Android and Blackberry** give you a pop-up right after you pair asking whether you want to allow access to your messages

- “Show Notifications” must be enabled on the phone to allow the radio to access messaging; this can be enabled by the following steps (after pairing and connecting to the radio):

- On the phone, select Settings, then Bluetooth, then properties (either device-friendly name such as “Chevrolet Cruze” or “Radio”), then turn “Show Notifications” on
- Restart vehicle for connection to take hold
- Once set, it is retained for future connections

- Visit gmttotalconnect.com for vehicle and smartphone compatibility

iPhone

- **Compatible iPhone users** have to go into Settings, then Bluetooth, select your vehicle and turn on notifications
- **Notes for iPhone**
 - Text Messaging functionality with iPhones is limited to Apple restrictions on what the radio can access, e.g., text messages received prior to entering the vehicle will not be displayed—and you cannot reply to a text message

CAMARO – CRUZE – EQUINOX MALIBU – SS – VOLT

SIRI EYES FREE FOR IPHONE USERS

SIRI EYES FREE FOR IPHONE USERS

Siri Eyes Free gives **compatible iPhone users hands-free access to some of their phone's features**, like the **calendar** and **text messaging**. Chevrolet is the first manufacturer in-market with Siri Eyes Free.

Siri Eyes Free allows users to direct Siri to perform a number of tasks while they safely keep their eyes on the road and their hands on the wheel. To further minimize distraction, Siri takes hands-free functionality even further with an **Eyes Free mode** that enables users to **interact with their iPhone using nothing more than their voice** while keeping the device's screen from lighting up, one more potential distraction that Siri Eyes Free eliminates.

Video: Siri Eyes Free

HOW TO USE SIRI EYES FREE

Owners simply **connect their iPhone** with the MyLink radio via Bluetooth, pair with the system, and use the Push-to-Talk (PTT) button on the steering wheel controls to begin and end sessions with Siri in Eyes Free mode. Press and hold the PTT button until Siri speaks; pressing and holding the PTT button for too short a period of time will engage the onboard voice recognition system and bypass Siri. Siri can:

- **Make voice-activated, hands-free calls to contacts on their iPhone**
- **Play songs in the iTunes library** and even switch music sources automatically from AM/FM/XM radio to iPod mode
- **Listen to, compose and send an iMessage or text message** to a phone number or anyone in saved Contacts
- **Access calendar and add appointments**
- **Answer simple questions** such as game scores or the dates of national holidays; while in Eyes Free mode, Siri will not provide answers to complex questions that require displaying a web page

TRAX - SPARK SPARK EV - SONIC

ONSTAR WITH 4G LTE

ONSTAR WITH 4G LTE¹ MAKES YOUR VEHICLE A ROLLING HOTSPOT

Your vehicle can be a rolling mobile hotspot with great signal quality and bandwidth for up to seven devices. OnStar with 4G LTE service allows everyone in your vehicle to enjoy his or her own content. A three-month/3GB, whichever comes first, trial is included when the OnStar complimentary service is activated (OnStar's Basic Plan is included for five years).

Press the OnStar Voice Command Button on the mirror or overhead console or, if available, select the "OnStar" icon on the radio home screen. Wait for the prompt and the beep and say, "Wi-Fi Settings." The screen will display the name and password for your Wi-Fi hotspot.

Go to Settings on the device you want to connect and find the name of your vehicle's 4G LTE Wi-Fi connection. Select the hotspot and input the password. Then, connect.

Press the blue OnStar button and speak to an Advisor to change your 4G LTE Wi-Fi name and/or password, or manage your settings in your RemoteLink mobile app.

Some services require a data plan.

TRAX - SPARK SPARK EV - SONIC

THREE FEATURES BRING ADDED CONNECTIVITY AND CONTROL TO MYLINK

2015 MyLink keeps lifestyles connected with **your customers' favorite smartphone features and apps accessible:**

- **BringGo** – The most affordable **in-dash navigation system** in the segment brought to you by Chevy—the only manufacturer capable of pairing to a compatible smartphone navigation app
- **TuneIn** – a **free Internet radio station** that lets you listen to 70,000 stations from around the world
- **Siri Eyes Free** – gives compatible iPhone users **hands-free access to some of their phone's features, like the calendar and text messaging**; Chevy is the first manufacturer in-market with Siri Eyes Free

SETTING UP BRINGGO

BringGo installs an in-dash navigation system in your vehicle via a smartphone app. **Your smartphone must be connected to MyLink to use BringGo in the vehicle**—connect Androids via Bluetooth and iPhones via USB cable. BringGo may be used as a stand-alone app on your phone when you are away from your vehicle. A BringGo User Manual is available at the BringGo website, bringgo.com.

To set up BringGo for in-vehicle use:

- **Download the BringGo app** for your region from the Apple App Store (iPhone), Google Play (Android) or BlackBerry World (BlackBerry)
- **Install app on your smartphone**
- **Connect phone to MyLink** – your smartphone must be connected to MyLink to use BringGo
 - Bluetooth for Android
 - Cable for iPhone
- Androids and Blackberries, tap smartphone link on phone, then tap BringGo link on phone to begin navigation service
- iPhones, start the app and turn on “Location Services”
 - Choose the maps you want to download and install

TRAX - SPARK SPARK EV - SONIC

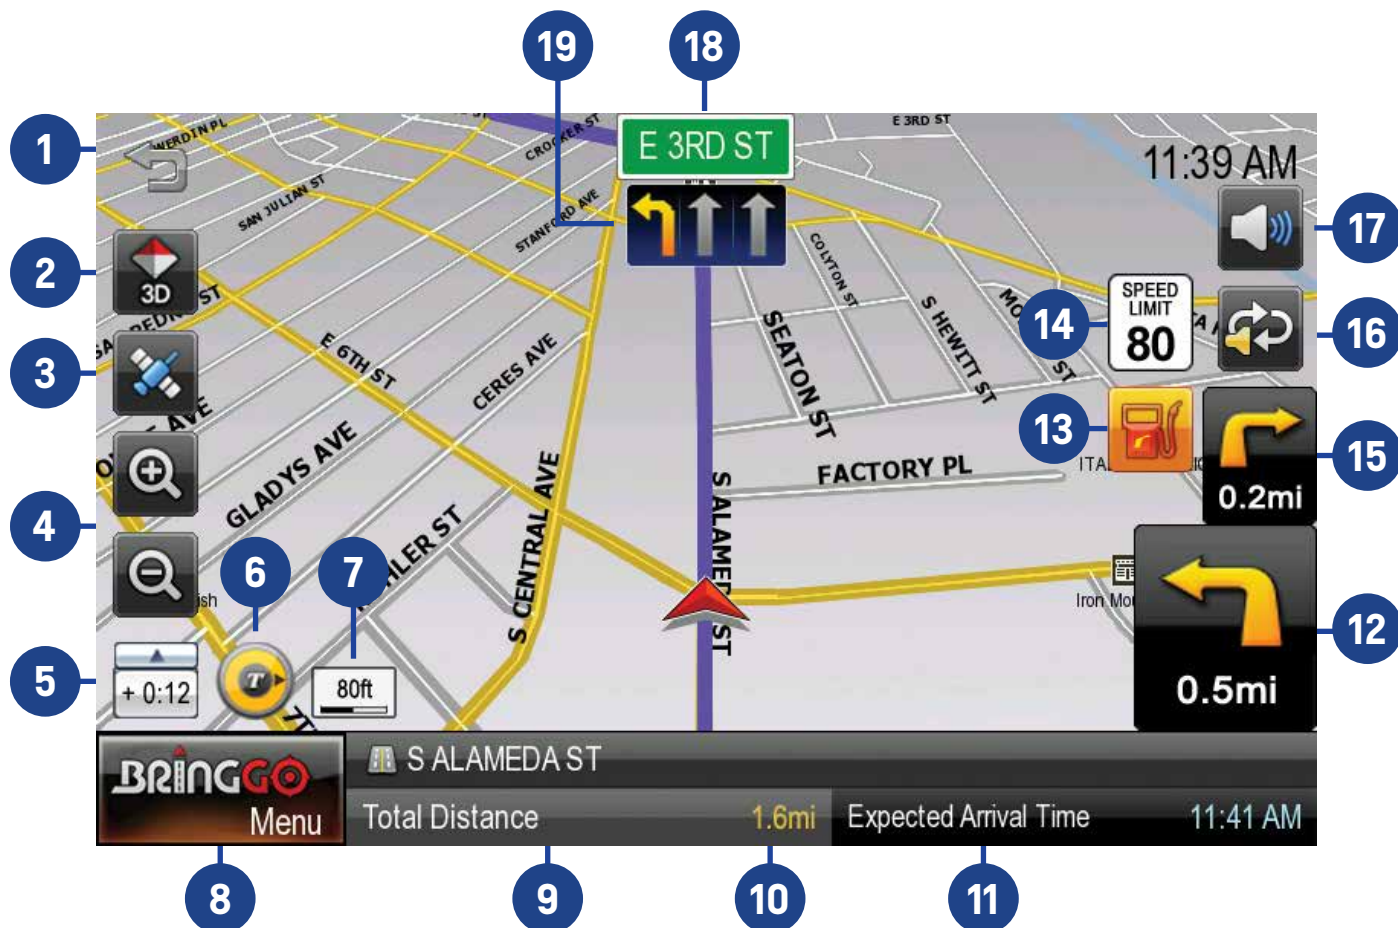

PLANNING A ROUTE

The BringGo menu screen shows the **eight ways you can enter a destination**:

- 1 **Single line address** – enter an address in a single line
- 2 **Address** – enter an address in steps: city, street, house number
- 3 **Recent list** – view a list of previously searched locations
- 4 **Favorites** – access or manage your favorite locations
- 5 **POI** – find a “Point of Interest” such as a restaurant, gas station, or hotel
- 6 **Home/office** – go to the address saved as your home or office
- 7 **Current location** – view details of your current location (requires a valid GPS signal)
- 8 **Coordinates** – enter a destination by latitude and longitude

TRAX - SPARK SPARK EV - SONIC

BRINGGO GUIDANCE WHILE DRIVING

After you set a destination, BringGo will calculate a route. Once you begin moving, the system will use the **GPS information to update your position** on the map and start to give you guidance

- | | | |
|--|--|---|
| 1 Back button | 8 Menu button | 15 Second Turn-by-Turn instruction |
| 2 Compass: Tap this icon to change the map display mode to Track up, North up or 3D view | 9 Distance To Go and Total Distance | 16 Repeat the Voice Guidance announcement |
| 3 GPS (Tap to go to GPS screen) | 10 Current street name/Destination | 17 Voice Guidance On/Off |
| 4 Zoom In (+) / Zoom out (-) | 11 Expected Arrival of Time and Time To Go | 18 The name of the next street to turn onto |
| 5 Traffic Bar | 12 First Turn-by-Turn instruction: Indicates the next turn direction | 19 Lane guidance |
| 6 Traffic Status Icon | 13 Low Fuel Indicator* | |
| 7 Map Scale | 14 Speed Limit | |

* Please note that this function is only available for specific car models.

TRAX - SPARK SPARK EV - SONIC

BRINGGO GUIDANCE WHILE DRIVING

While you're under guidance, a number of BringGo features give you map view options to help you as you drive.

- **Lane guidance** helps you safely prepare for your next maneuver by displaying the correct lane(s) to stay in. Lane Guidance appears in the "Next Street Name" box. The highlighted arrow indicates the correct lane(s). The example below indicates a left turn
- **Signposts** provide a realistic representation of **actual signs at complex highway junctions**. The signpost replaces the normal "Next Street Name" box at some junctions
- **Junction view** provides a **realistic view of the highway as you approach a junction**. This view displays the highway lanes, shields, directions and lane information in a split-mode view. Junction view may be turned on or off in the Display Settings
- **Turn-by-Turn (TBT)** offers a more **simplified guidance mode**. To access this screen, tap "Menu," then "My Route" and "Turn-by-Turn"

BRINGGO BRINGS HIGH VALUE AT LOW COST

A **trial version** of BringGo is available for \$0.99. Using it is a good way to check phone compatibility. Purchasing BringGo **without map updates costs \$49.99**. A purchase **with map updates in years two and three costs \$59.99**.

TUNEIN RADIO OPENS UP THE WORLD OF RADIO

This is a really fun app that provides access to **more than 70,000 radio stations around the world, free of charge**, although data rates do apply. Unlike Pandora, which is like a "mix tape," TuneIn features live streaming of global radio. To use:

- **Download app** from iTunes (iPhone) or Google Play (Droids) to smartphone
 - Androids require Bluetooth pairing; iPhones require Bluetooth pairing and cabling for full functionality
- **Connect phone via MyLink**
- Icon appears on Home Page

TuneIn lets you listen to radio, music, news, sports, talk from anywhere. You can sort your listening choice by:

- Genre
- Location
- Sports team name
- Station type
- Call sign

TuneIn has an easy-to-use **search function** and allows you to **save favorites**.

SIRI EYES FREE FOR IPHONE USERS

For more information on how to use Siri Eyes Free turn to page 3.

TEXT MESSAGE ALERTS AND TUNeselect ADD VALUE FOR CUSTOMERS

Video: Text Message Alerts

TEXT MESSAGE ALERTS

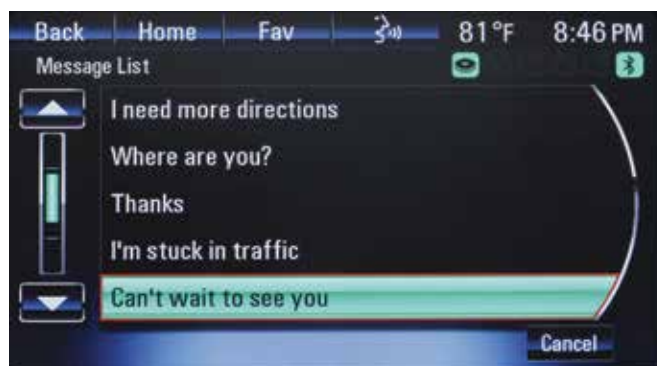

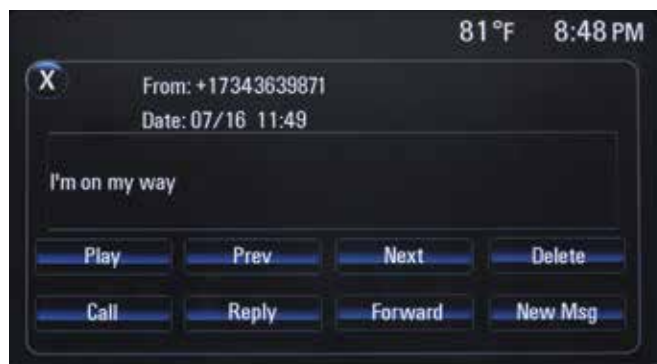

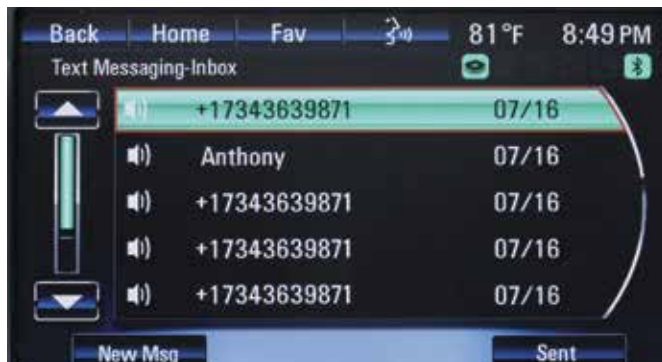

If your Traverse with MyLink is paired with a Bluetooth device that supports Text Message Alerts, the system:

- Can display important text messages
- Can play them back over the audio system
- Can send preset or create new preset messages
- Requires a compatible smartphone with Bluetooth profile (M.A.P.) and applicable text messaging features.

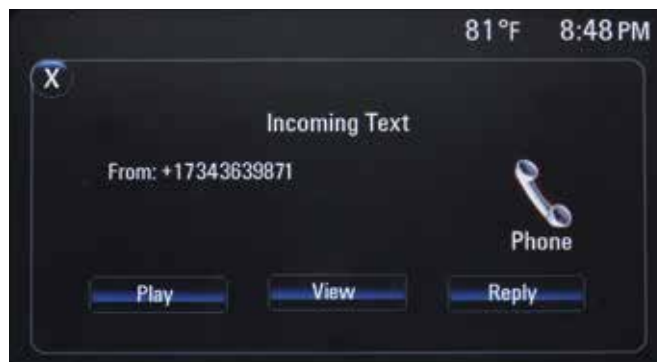

For more information about varying capabilities, go to gmttotalconnect.com. For example, iPhones require unique set up requirements and offer limited Text Message Alert capabilities

HOW TO USE TEXT MESSAGING

- Press “**Message**” button on Home Page
- When messages are retrieved, “**Text Message**” inbox displays
- **Select message for viewing** (only available when vehicle is not moving)

- Select “**Reply**” to reply and select desired message from display of preset messages, then select “**Send**” (this function is not available for iPhones)
- **Incoming text messages**
 - Pop-up screen displays
 - Select “Listen,” “Play” or “View”
 - Turn off display alerts from the “Settings” button

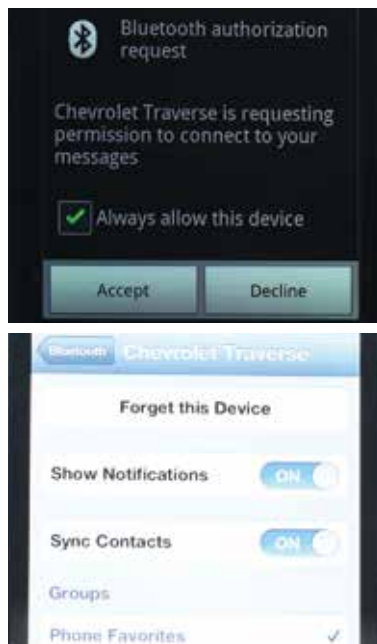

TEXT MESSAGE ALERTS AND TUNeselect ADD VALUE FOR CUSTOMERS

SETTING UP TEXT MESSAGING DURING PHONE PAIRING

- **Android and Blackberry** give you a pop-up right after you pair asking whether you want to allow access to your messages
- **iPhone users** have to go into Settings, then Bluetooth, select your vehicle and turn on notifications
- **Notes for iPhone**
 - Text Messaging functionality with iPhones is limited to Apple restrictions on what the radio can access, e.g., text messages received prior to entering the vehicle will not be displayed—and you cannot reply to a text message
 - “Show Notifications” must be enabled on the phone to allow the radio to access messaging; this can be enabled by the following steps (after pairing and connecting to the radio):
 - On the phone, select Settings, then Bluetooth, then Properties (either device-friendly name such as “Chevrolet Traverse” or “Radio”), then turn “Show Notifications” on
 - Restart vehicle for connection to take hold
 - Once set, it is retained for future connections
- Visit gmttotalconnect.com for vehicle and smartphone compatibility

HEAR YOUR FAVORITE ARTISTS OR SONGS MORE OFTEN WITH TUNeselect

MyLink radios with navigation equipped with SiriusXM, can be set to alert you when a selected artist or song is playing on another XM station. To use:

- Select “Menu” when the specific song or artist is playing. Select TuneSelect, and the following will display
 - Artist: Press to set an audio alert when the current artist is playing on a SiriusXM channel
 - Song: Press to set an audio alert when the current song is playing on a SiriusXM channel
- TuneSelect Manager: Press “Disable/Enable All Alerts” to enable or disable all alerts; a checkmark next to the alert means it is turned on. Press an alert to turn it off; press “Delete” to delete an alert
- Audible Alert: This feature will give an audio alert when certain artists or songs are available on a specific station. Press to turn on or off

NEW SIRI EYES FREE FEATURE ADDS CONTROL FOR CUSTOMERS

SIRI EYES FREE FOR IPHONE USERS

Siri Eyes Free gives **compatible iPhone users hands-free access to some of their phone's features**, like the **calendar** and **text messaging**. Chevrolet is the first manufacturer in-market with Siri Eyes Free.

Siri Eyes Free allows users to direct Siri to perform a number of tasks while they safely keep their eyes on the road and their hands on the wheel. To further minimize distraction, Siri takes hands-free functionality even further with an **Eyes Free mode** that enables users to **interact with their iPhone using nothing more than their voice** while keeping the device's screen from lighting up, one more potential distraction that Siri Eyes Free eliminates.

Video: Siri Eyes Free

HOW TO USE SIRI EYES FREE

Owners simply **connect their iPhone** with the MyLink radio via Bluetooth, pair with the system, and use the Push-to-Talk (PTT) button on the steering wheel controls to begin and end sessions with Siri in Eyes Free mode. Press and hold the PTT button until Siri speaks; pressing and holding the PPT button for too short a period of time will engage the onboard voice recognition system and bypass Siri. Siri can:

- **Make voice-activated, hands-free calls to contacts on their iPhone**
- **Play songs in the iTunes library** and even switch music sources automatically from AM/FM/XM radio to iPod mode
- **Listen to, compose and send an iMessage or text message** to a phone number or anyone in saved Contacts
- **Access calendar and add appointments**
- **Answer simple questions** such as game scores or the dates of national holidays; while in Eyes Free mode, Siri will not provide answers to complex questions that require displaying a web page
